AI	Gemini, OpenAI, Langchain, @ai/sdk

EXPERIENCE

Co-Founder & Lead Engineer Recruitify	March 2025 - Present <i>Newmarket, UK</i>
---	--

- Spearheaded development of the Recruitify platform using Next.js, Prisma, NeonDB (PostgreSQL), Tailwind CSS, and shadcn/ui—enabling recruiters to spin up 100+ fully responsive, SEO-optimized career sites.
- Architected a Headless-CMS-style dashboard that ingests and centralizes 5,000+ candidate submissions per month, ensuring end-to-end data integrity and 99.9% uptime.
- Optimized front-end performance to achieve sub-2 second Time-to-Interactive (TTI) and a 98 Lighthouse SEO score, reducing bounce rates by 30%.
- Designed the Prisma/NeonDB schema to scale to 10,000+ active candidate records—supporting real-time filtering and analytics on recruiter dashboards with under 100 ms query latency.

Senior React Developer Prodago	March 2025 - Present <i>Lahore, PK</i>
--	---

- Leading development on the CMS Platform's UI.
- Implemented UI/UX improvements increasing user retention and usage efficiency by 12%.
- Optimized components using Virtualization and Suspense improving performance by 20%.

Frontend Team Lead Digimark Developers	October 2024 - Present <i>Lahore, PK</i>
--	---

- Spearheaded comprehensive training programs for a team of 10 frontend engineers.
- Implemented frontend architecture patterns, promoting modern coding practices across 7 projects.
- Established state-of-the-art design principles, using shadcn/ui, Redux Toolkit and TanStack Query.

Frontend Engineer City Doctor	May 2024 - December 2024 <i>Dubai, UAE</i>
---	---

- Developed the Company Website using Next.js, TailwindCSS and RTK Query.
- Developed the Sister Company Website using Next.js, TailwindCSS and RTK Query.
- Developed the Company CRM that handled Order Management, Partner Management and more.

Frontend Engineer F&C Properties	Jan 2024 - December 2024 <i>Dubai, UAE</i>
--	---

- Achieved 16% growth for Company Revenue using Next.js, TailwindCSS, and RTK Query.
- Developed the Company Website that increased impressions, traffic, and organic leads by 33%.
- Developed a CMS for data and site management using React, TailwindCSS, and RTK Query.

Software Engineer

Purelogics

Apr 2023 - Dec 2023

Lahore, PK

- Led the Back-end Development on a project achieving a 21% performance increase in API response.
- Developed the Back-end for a cross-platform healthcare application.
- Contributed to diverse projects across the company, providing full-stack expertise.
- Participated in talent acquisition by interviewing junior and mid-level frontend engineers.
- Created standardized documentation to support requirements gathering and analysis.

Frontend Engineer

SoftSquare

Nov 2022 - Mar 2023

Lahore, PK

- Translated mock-ups into high-quality, visually appealing user interfaces.
- Customized various CSS frameworks to achieve optimal design outcomes.
- Developed efficient and reusable Vue.js components to enhance user experience.
- Delivered end-to-end front-end applications that aligned with client needs.

PROJECTS

Recruitify: Recruitify is a website builder for recruiters, allowing them to create recruitment websites and panels for easier data collection. ([Try it here](#))

- Developed a fully responsive, SEO-optimized recruitment website builder using Next.js, Prisma, NeonDB (PostgreSQL), Tailwind CSS, and shadcn/ui—enabling creation of 100+ custom templates within six months.
- Implemented a modular template library (20+ reusable components) that reduced new site assembly time by 40%, supporting 50+ active recruiter clients.
- Engineered a centralized dashboard for real-time analytics, processing 5,000+ candidate submissions monthly with average API response latency under 100 ms.
- Achieved consistent Lighthouse scores above 95 for performance and accessibility across all generated sites, cutting average page load time to 1.8 seconds.

PrimeRise: A cutting-edge CMS that streamlined the management of compliance content—including COs, OPs, PPs, and accountabilities—for an AI-powered governance platform.

- Optimized UI/UX design to reduce page load times by 25%, ensuring a seamless UX.
- Coordinated with backend and compliance experts to integrate complex regulatory requirements into the CMS.
- Implemented optimizations and scalable design patterns that reduced system downtime by 20%.
- Refactored frontend code to reduce page load times by approximately 15%.

City Doctor Website: City Doctor is a healthcare firm delivering accessible solutions, including on-site diagnosis and treatment following a booking. ([Code](#))

- Developed the user interface from scratch using Next.js, TailwindCSS, and RTK Query.
- Leveraged Next.js server-side rendering (SSR) for advanced SEO, resulting in a fast and SEO-friendly website.
- Achieved a 22.6% increase in traffic and impressions over three months.
- Integrated Sanity CMS to manage dynamic content for healthcare services and FAQs.

Driphub Website: Driphub, the sister firm to City Doctor, provides home-based drip services to address mildly difficult medical issues such as food poisoning, insomnia, and lethargy. ([Code](#))

- Developed the complete user interface using Next.js, TailwindCSS, and RTK Query.
- Implemented SSR for a fast, efficient, and SEO-friendly website.
- Achieved a 28.3% increase in traffic and impressions over three months.
- Integrated Sanity CMS for streamlined content management.

F&C CMS: Built a comprehensive CMS for managing real-estate property data.

- Developed the UI from scratch using React.js, TailwindCSS, and RTK Query.
- Reduced data management costs by approximately \$50k/month.
- Increased data addition and processing speeds by 112%, along with faster web app deployments.
- Improved the quality of organic real-estate leads by 9.4% through enhanced information and ad campaigns.

SedCard: SedCard is a professional composite card maker for models, allowing users to create and download their composite cards as PDFs. ([Try it here](#))

- Developed the complete application from scratch using Vue.js and TailwindCSS.
- Created efficient, modular custom UI components tailored to client requirements.
- Delivered a pixel-perfect design.
- Developed robust business logic to handle scalability.

AIOMEGA: Focused on health and fitness products to reduce costs and complications in biotechnology and health-care.

- Led the backend team post-MVP development.
- Improved backend response time and performance by approximately 57.3%.
- Collaborated with DevOps to set up CI/CD secure pipelines for efficient development.
- Interacted frequently with the client to clarify requirements and translate them into viable backend solutions.
- Established staging and development servers for QA testing.
- Implemented real-time data and usage logs to monitor user experience and ensure business logic integrity.

EDUCATION

Bachelor of Software Engineering (Hons.), GIFT University
Minor in Data Science

2014 - 2019

- Technical Head - YCPS (Young Computer Professionals Society).
- Vice President - English Drama and Literature Society.
- Best Commercial Capstone Project Award.
